

INTRODUCTION

CANA offers **once-in-a-generation opportunities** for clients and partners in the electric mobility and infrastructure markets. The future of electric is now.

CANA's offerings are applicable and adaptable across a wide range of **commercial and governmental electric mobility efforts** while our reputation as a small business Prime contractor with current Federal DOD contracts - and our established network of partners - help create opportunity to bring and **support electrified technology aboard military installations and in the future battlespace.**

CANA's analytics and logistics portfolio includes modeling, simulation and analysis (MS&A); data distribution and logistics management software; e-mobility infrastructure services, and consulting services including assessments, action plan development, and project management support.

CANA offerings are customizable to the market:

- **Analytics Network Support System (ANTSS).** A digital data and analytics platform providing the data "wiring harness" between mobility cluster assets and algorithms that add the "smarts" to design, plan and manage mobility.
- **Innovation Lifecycle Management.** Lead system integration and strategic stakeholder engagement for client projects.
- **Warehouse Software & Services (WS2).** Customized analytics to improve inventory management, data and asset visibility, reporting, and processes.
- **Operations Optimization Tools.** Tools that determine requirements, create sourcing solutions, provide risk analysis, mitigate distribution shortfalls and determine stocking levels at different locations balanced to optimize investment and identify shortfalls.
- **Advanced Energy Tool Kit.** Analytical tools and techniques to account for incorporation of advanced energy technologies and understanding of their impacts on increased military operational flexibility.

CANA ELECTRIFICATION MOBILITY & INFRASTRUCTURE

Where do you need us?

CANA's expert electrification support is focused in the Southern California and Mid-Atlantic markets and includes: Mobility clusters aboard military installations; urban electrification; smart city initiatives, wildfire mitigation, warehousing & logistics, disaster response, agriculture markets, and DoD applications.

Powered by CANA Analytics Is:

- **Our CANA Professionals.** We are subject matter experts *and* award-winning and experienced analytics professionals in: Applied Analytics Methods & Training; Software Development; Supply Chain & Logistics Operations; Program Management; Energy Infrastructure & Mobility Planning; Logistics Systems Integration.
- **Our CANA Solutions.** Our solutions are data driven models and software products for users. They include: Warehouse Management Software & Services (WS2); Modeling, Simulation & Training (MS&T) for Advanced Energy Analysis & Modeling, Transportation & Distribution Models, and Supply Chain Analytics Scenario Design.
