

TESIAC

MOBILITY | TECHNOLOGY | ENERGY

Bringing “Infrastructure-as-a-Service” to the Public & Private Sectors

Confidential

Executive Summary

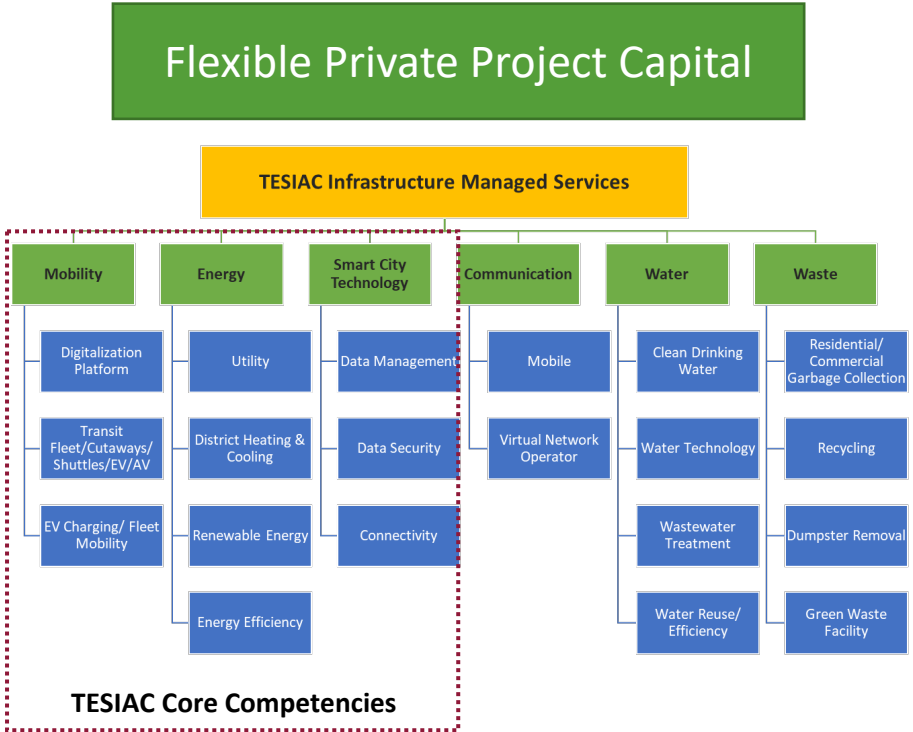

- TESIAC is a Managed Services Platform which aggregates **mobility, energy, technology, and private capital** to **deliver integrated and interoperable infrastructure** to accelerate and assure community sustainability goals are met.
- TESIAC brings an **experienced and interdisciplinary team and partners** together with new and innovative technologies.
- TESIAC seeks a true **partnership with the client and alignment with stakeholders** to reach optimal Smart City alternatives rather than bringing pre-conceived answers or technologies.
- Whether it be climate change, sustainability goals, perceived social inequities, need for growth, jobs, or other drivers, TESIAC brings together **the physical and the digital worlds in a highly collaborative approach** to develop new and targeted options rooted in mobility and infrastructure.

Infrastructure as-a-Service

Flexible project capital facilitates TESIAC's delivery of Infrastructure as a Service.

Municipalities, fleet operators, and private enterprises are being pressured to modernize and align fleets with sustainability mandates, but the CAPEX required to do so is prohibitive and difficult to pass through bureaucracy.

TESIAC can deliver private financing to accelerate the transition to intelligent zero-emission fleets, charging/refueling infrastructure, onsite energy generation, and smart city technology.

TESIAC's Core Competencies

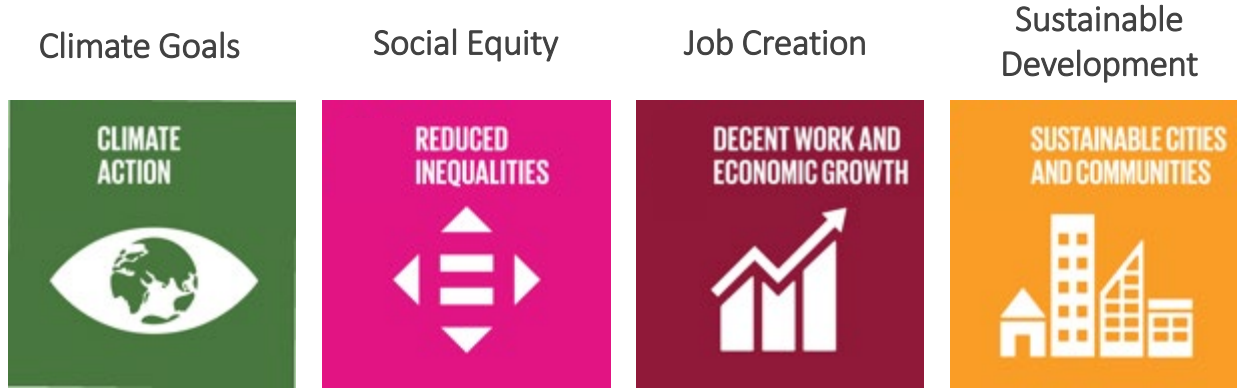

Mobility	Technology	Energy
Accelerate Zero-Emission Fleet Adoption	Open Standards / Interoperability	Reliable & Resilient Power
Demand Response Accessibility	Predictive Analytics / AI	Integrated & Scalable
Right-Sized Vehicles	Cross Entity Integration	Sustainable On-Site Generation
Enhanced Safety & Security	Enhance Ridership Experience	Achieve Climate Goals

Flexible and Innovative Capital Structures

TESIAC's integrated solution approach helps communities and corporate participants achieve their goals...

...by delivering interoperable infrastructure...

Through creative financial structuring, holistic planning, and phased integration of infrastructure components, TESIAC creates value and brings advantages to the multiple stakeholders including access to capital, payment certainty, resilience, reliability, and consumer convenience, **delivering Smart Cities with an ROI.**

A growing pipeline of high potential pilot projects

...with mobility at its core.

Our innovative, scalable platform, built around Mobility as a Service, combines flexible private capital and integrated mobility, technology, and energy solutions to deliver value to communities, consumers, business, and other constituencies.
